Planning for resources Islam takes 10 years and probably another 10 years to actually build it. So we always have to plan 25 years in advance for a population 25 years later and you know similar to what many things happen in the world. We usually plan something for the present and then it doesn't end up working out for object data is currently a PhD student at the University of British Columbia in Vancouver Abhishek is pursuing a PhD

Around and just give you a sense of like where I'm coming from with regard to my basic science training. So basically, I have a PhD from UC Berkeley University of California Berkeley. I graduated in 2009. I went on to do postdocs at Harvard MIT University of Minnesota and every University. I went to college or I got my Bachelor's of science summa cum laude at Emory University in Atlanta in 2003. So

yeah, that is one they say is that is that someone telling you that it's time to retire? Yeah. No, that is one percentage. All right, but this that maybe maybe this one percent but I just hate the idea of being an expert. I just think being a student is so much more fun being a student of your craft being a student of the world being open and just learning about things is so much more fun because once you are stuck in a way of doing things or a way of thinking about things you just you just get

You know on a single person's budget with some student loans my gosh leave leave a thumbs up or swipe up to subscribe or leave a review for student loans. It's it's a real challenge financially to be able to forecast the amount of items. I would need to sell before taxes to be able to even think about being full-time not to mention the real adult stuff here like insurance.
